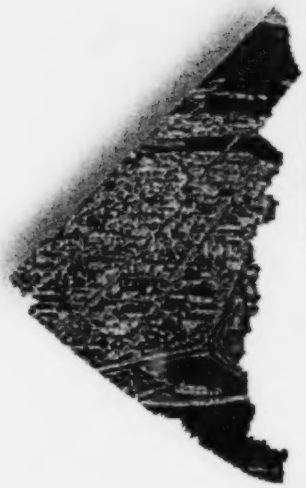
BUREAU OF STATISTICS
CENSUS 2001

Unpaid Work and Place of Work

Highlights

The following statistics are from the 2001 Census of Canada which occurred on **May 15, 2001.**



Housework & Childcare

About one third of Yukoners (32.4%) did between 5 and 14 hours of unpaid housework in the reference week. The majority of Yukoners (60.1%) reported no hours of unpaid childcare during the reference week.

Place of Work

Yukoners were most likely to report having a usual place of work (82.9%).

Income

Yukoners who reported to a usual workplace were more likely than those who worked at home to have an income greater than $40,000; those who worked at home were more likely to have an income of less than $20,000.

Note: For definitions of terms used in this publication, see page 4.

Notes

Place of work status: Refers to the place of work of non-institutional residents 15 years of age and over who have worked since January 1, 2000. The variable usually relates to the individual's job held in the week prior to enumeration. However, if the person had not worked during that week but had worked at some time since January 1, 2000, the information relates to the job held longest during that period.
Worked at home: Persons whose job is located in the same building as their place of residence, persons who live and work on the same farm, and teleworkers who spend most of their work week working at home.
Worked outside Canada: Persons who worked as diplomats, Armed Forces personnel and other persons enumerated abroad. Includes also recent immigrants who may not currently be employed but whose job of longest duration since January 1, 2000 was held outside Canada.
No fixed workplace: Persons who do not go from home to the same workplace location at the beginning of each shift. Such persons include building and landscape contractors, travelling salespersons, independant truck drivers, etc.
Usual place of work: Persons who are not included in the categories described above and who report to the same (usual) workplace location at the beginning of each shift.
Unpaid housework: Refers to the number of hours spent doing unpaid housework, yard work or home maintenance in the week (Sunday to Saturday) prior to Census Day. It includes hours spent doing housework for one's own household or the household of others. Data are available for persons 15 years of age and over, excluding institutional residents.
Unpaid childcare: Refers to the number of hours persons spent taking care of their own or someone else's children without pay in the week (Sunday to Saturday) prior to Census Day. Data are available for persons 15 years of age and over, excluding institutional residents.
